\*\* Coronary Heart Disease refers to hypertensive heart disease and ischemic heart disease, including acute myocardial infarction and atherosclerotic cardiovascular disease.

<sup>a</sup> All rates are per 100,000 population.

<sup>b</sup> Adjusted rates are adjusted to 2000 Standard U.S. Population.

<sup>c</sup> Deaths with unknown age, region or race/ethnicity are reflected in the county total, but not in the individual categories. Category sums may not add up to county total.

<sup>d</sup> Race/ethnicity data may be different from previously published data, due to minor state modifications in the way it provides race data starting in 2003.

\* Rate not calculated for fewer than 5 deaths in this category.
