Yersiniosis		11	11	12	4	5	19	5	8	7	9

Produced by the Division of Community Epidemiology

■ Shaded box indicates year disease became reportable to CA Dept of Health Services; for diseases with no shaded box the disease was report able throughout the entire period. Some diseases have cases reported prior to the year they became reportable.

AIDS cases are reported by year of diagnosis due to the substantial delay between diagnosis and report

*These conditions are reportable as unusual disease occurrences

¶ Excludes single cases of Scombroid Fish Poisoning

¢ Foodborne data prior to 1995 are not comparable (NC) with most recent years due to changes in case definitions

§ Positive laboratory tests as reported to the CA State Veterinary Unit; includes animals tested by Public Health Laboratory & County Veterinarian

μ Voluntarily reportable by request of the local health officer
