| Yersiniosis | 8 | 7 | 9 | 6 | 16 | 23 | 6 | 10 | 7 | 9 |

■ Shaded box indicates year disease became reportable to CA Dept of Public Health; for diseases with no shaded box the disease was reportable throughout the entire period. Some diseases have cases reported prior to the year they became reportable.

AIDS and HIV cases are reported by year of diagnosis. Due to delays between diagnosis and report, AIDS and HIV cases for 2009 will continue to be reported into mid to late 2010. HIV became reportable by name starting April 17, 2006 therefore 2006 is not a complete year of reports.

¶ Excludes single cases of Scombroid Fish Poisoning.

§ Positive laboratory tests as reported to the CA State Veterinary Unit; includes animals tested by Public Health Laboratory & County Veterinarian

μ Voluntarily reportable by request of the local health officer.

φ In 2004 case definition expanded to include individuals with blood lead levels above 10 ug/dL

** Data for these diseases and conditions not yet available for 2009.
