**COUNTY OF SAN DIEGO  
HEALTH AND HUMAN SERVICES AGENCY  
ALCOHOL AND DRUG SERVICES**

**Vision:**

*Safe, healthy, and thriving communities free of alcohol and drug problems.*

**Mission:**

*Lead the County of San Diego's strategy to reduce alcohol and other drug problems.*

**Guiding Principles:**

- *Provide leadership at National, State and local levels to reduce the full range of alcohol and other drug problems;*
- *Promote, expand, and maintain an array of prevention, intervention, treatment, and recovery services;*
- *Emphasize prevention efforts that hold future possibility of reducing need for more intensive intervention and treatment;*
- *Promote quality customer service related to communities, clients, service providers, other agencies, and each other;*
- *Assure the cost effectiveness, feasibility, and quality of community-based prevention, intervention, treatment, and recovery services;*
- *Leverage opportunities for capacity building and increasing funding resources in partnership with communities, service providers, and agencies; and,*
- *Maintain staffing levels and training opportunities in support of Alcohol and Drug Services infrastructure.*

**Alcohol and Drug Services (ADS)** provides alcohol and other drug prevention, pre-treatment, treatment, recovery, case management, and ancillary services to County residents, usually through contracts with private, not-for-profit, community-based agencies, but also through collaboratives between private and public agencies. ADS spearheads several County initiatives, including: the Proposition 36 treatment alternative for individuals convicted of non-violent drug offenses; the Substance Abuse Recovery Management System (SARMS) for parents involved in dependency court; Screening, Brief Intervention, and Referral (SBIR) in local emergency departments and trauma centers to ensure that individuals visiting the emergency departments and trauma centers are appropriately referred for substance abuse treatment when needed; Drug Courts that provide a coordinated system of case management, treatment, and graduated sanctions for individuals convicted of drug-related crimes; and adolescent services, including: early intervention, assessment and mentoring, residential detox, non-residential treatment, long term residential treatment, and case management. ADS also provides CalWORKs case management for clients whose substance abuse is a barrier to work, administers the state licensed Driving Under the Influence Program, PC 1000 Delayed Entry of Judgment and court-ordered AIDS Education programs. In addition to the array of services mentioned above, ADS sponsors the Methamphetamine Strike Force, a multi-agency group that addresses the methamphetamine problem endemic in the County, the annual Substance Abuse Summit (SAS), a two-day hosted event highlighting best practices, emerging problems, workshops on diverse issues, and Countywide media advocacy.

- **PREVENTION:** Prevention is a major focus and priority in ameliorating alcohol and other drug problems, particularly as governmental resources continue to diminish as needs grow. In 1990, the Board of Supervisors adopted a Countywide prevention policy, out of which grew an alcohol and drug specific prevention policy and framework in 1992. The County's Prevention Framework emphasizes four general areas: community development, community problem solving, personal problem solving, and personal growth and development, (i.e., development of risk-protection/resiliency factors - that is, seeking approaches which identify the major conditions which cause or worsen the problem and then reducing or eliminating these factors and conditions through prevention.)
- **PRE-TREATMENT:**
  - **Residential Detoxification** (detox) is the therapeutically supervised withdrawal from the drug of addiction culminating in total abstinence. Detox usually lasts from 5 to 7 days, but can extend up to 21 days and is the first step to other treatments that result in recovery from dependence.
  - **Inebriate Reception Services/Community Sobering Services** are brief intervention services provided through brief stays in a supportive non-drinking environment for individuals dropped off by law enforcement. The setting

provides a protective milieu for public inebriates to become sober and receive appropriate information and referrals for further alcohol and drug treatment and recovery services.

- **TREATMENT:** Formal services that establish a relationship between a client and counselor and that include case file management with a treatment plan to achieve clear and measurable goals and objectives such as attendance at specific individual or group sessions, drug testing results, and a formal exit interview upon achievement of the specific goals and objectives.
  - **Non-Residential Treatment** provides structured alcohol and drug treatment services in either Outpatient Drug Free (ODF) or Day Treatment (DT) Programs. ODF programs provide individual, group, family or other counseling sessions. DT involves a weekly schedule that requires attendance for a specified number of hours a day for at least 3 days a week, where clients engage in assigned supervised activities. Both ODF and DT programs focus on developing life skills such as home management, diet/nutrition, vocation, and parenting, all of which contribute to self esteem and improve client ability to function.
  - **Short Term Residential Treatment** is usually 90 days or less, highly structured, offering environmental therapy, referrals to appropriate social service supports, and integration to drug-free employment, support for transition back to family or supportive environment. Once in the community, non-residential aftercare services are routinely provided.
  - **Long Term Residential Treatment** are services that should be reserved for persons who have difficulty abstaining in a supportive, non-residential setting. Residential programs, usually at least 6 months duration, are designed to accommodate individuals with major impairments or social deficits, including those with histories of serious criminal behavior. The services are provided in highly structured treatment settings and, based on the particular program, may employ environmental therapy, cognitive-emotional therapy, and behavior modification progressing into occupational training, increased responsibilities within the program, access to social services and gradual easing into the community.
  - **Sober Living Environments** offer an alternative environment not subject to licensing by any State agency, or certification or accreditation. These programs are intended for cooperative living among individuals who are recovering from alcohol and/or drug addiction. Resident responsibility for the environment sets it apart from formal recovery programs.

- **RECOVERY**: A community-based program that provides a drug-free, sober, supportive social environment and offers services to people with alcohol and drug related problems. The major goal is to offer a variety of services to assist persons in developing a lifestyle that supports sobriety.
- **ANCILLARY SERVICES**: These services support the individual's recovery from alcohol and other drug addiction.
  - **Case Management**: Supervision and management of a client's progress through the continuum of alcoholism and drug dependencies treatment, including assistance with gaining access to other ancillary services such as health care, housing, education, job placement, and training.
  - **HIV Counseling and Testing**: Provides confidential testing of individuals at risk of HIV and/or AIDS and pre and post test counseling.

## Treatment Admissions by Primary Drug

Admissions to County-funded treatment programs increased steadily from 1997 to 2002. During 2002 there were 15,822 unduplicated admissions; 18% of these admissions are younger than 18. Cocaine and heroin have remained relatively stable during this period, while marijuana and methamphetamine increased. Alcohol admissions also increased during this time period but at lower rates. The growth in marijuana reflects the Board of Supervisor's support of treatment on demand for adolescents. Methamphetamine's increase is largely due to an increase in criminal justice referrals within this population. A majority of Drug Court, Proposition 36, Parolee Partnership Program, and Probationers in Recovery admissions report methamphetamine as their drug of choice.

# Positive Tests Among Adult Arrestees

Since 1997, cocaine-positive tests among adult arrestees in the Arrestee Drug Abuse Monitoring (ADAM) Project have been steadily decreasing; heroin-positive screens have been decreasing since 1999. The percent of arrestees positive for marijuana has been relatively stable over this time period, while the percent positive for methamphetamine dropped from 1997 to 2000, then increased in 2001. This graph supports the treatment graph in that marijuana and methamphetamine are the predominant drugs in both systems.
