

AGING & INDEPENDENCE SERVICES

COUNTY OF SAN DIEGO ■ HEALTH AND HUMAN SERVICES AGENCY

Business Plan Fiscal Years 2003-2005

BUSINESS PLAN

EXECUTIVE SUMMARY

Aging & Independence Services is committed to improving the lives of seniors and individuals with special needs in San Diego County, by providing access to information, case management, health services, advocacy, and community services in a caring and supportive manner. Aging & Independence Services serves seniors, disabled adults, abused, elderly and dependent adults, individuals with HIV, and others requiring home-based care to prevent institutionalization.

The goal of Aging & Independence Services is to provide a home and community-based system of services that combines needed services under one jurisdiction. The system of services integrates physical and psychological well-being, provides informed care-setting choices, and ensures affordable, efficient, high quality care to the elderly and disabled population of San Diego County.

INTRODUCTION

Aging & Independence Services has experienced significant growth and change since it was established as an Area Agency on Aging, beginning with a staff of three in 1970 and a budget of \$100,000. The organization is now part of the County of San Diego Health and Human Services Agency, employing 750 persons, utilizing the volunteer time of 1,700 individuals, and providing or contracting for services and programs with a budget of \$243 million dollars.

Services provided by Aging & Independence Services or through contracts with community-based organizations include five areas of focus:

- Information Services – The gateway to assistance;
- Home Based Services – Bringing care to the door;
- Protection & Advocacy – Ensuring the right to safety and dignity;
- Health Independence Services – Promoting wellness;
- Community Enrichment – Enhancing quality of life.

Aging & Independence Services has approximately 33 programs, and each program has different eligibility criteria based on age, level of need, and income. Programs are funded by the Older Americans Act, federal, state, and county funds – 42 funding sources in all. For over 25 years, the Older Americans Act has served as the cornerstone of federal involvement in a wide array of community services to older persons. Since its enactment, the Act has evolved from a program of small grants and research projects to a network of 57 state units of aging, over 670 designated area agencies on aging, and approximately 15,000 community organizations providing supportive social and nutritional services to older adults. Aging & Independence Services has a 33-member advisory council, which provides a liaison between the agency and older and disabled persons throughout the county.

AIS provides a wide range of services including information and access, advocacy, coordination, assessment, and authorization of direct services. Direct services are provided through contracts with vendors and agencies and include in-home support, respite care, meals (senior dining centers and home-delivered), health promotions, legal assistance, adult day care, transportation, educational opportunities, protective services, case management, employment, money management, and counseling programs. In general, if a San Diego resident is older or disabled, at risk of institutionalization, is low

income, and/or needs help in arranging for appropriate services, AIS can probably help. The array of services available allows the agency to coordinate services effectively.

The gateway to AIS services is through the agency's Call Center where staff provide initial assessment and channeling to appropriate services and information. Calls are screened to determine eligibility for AIS programs and/or referred to other appropriate community programs. The Call Center has merged the efforts of information and referral, case management program intake and the elder abuse reporting function, providing AIS the opportunity to implement a "no wrong door" model. The 1-800-510-2020 toll free telephone number provides immediate access to anyone calling within San Diego County. This service continues to evolve and improve as the agency learns from the public response.

VISION

A home and community-based "system of services" combined and integrated under one organization, serving the county's seniors and persons with disabilities.

- Fostering physical activity and mental stimulation, broadening social interaction, and encouraging self-reliance
- Responding to the needs and preferences of our customers and providing informed choices between care settings
- Integrating social programs with physical and mental health services, since physical and psychological well-being go hand in hand
- Ensuring our clients affordable, efficient, high-quality care

MISSION

The leader in:

Advocacy
Information, and
Safety

to foster independence and dignity for San Diego County seniors and persons with disabilities.

VALUES

Aging & Independence Services values:

- Teamwork & Communication
- Dedication to the Client
- Empowerment of Employees
- Stability and Security for Employees
- Innovation

HEALTH AND HUMAN SERVICES AGENCY INITIATIVES

Initiative One: Kids

The County of San Diego is committed to improving opportunities and outcomes for children. Our vision is for children to be healthy, to be cared for and protected, and to reach their full potential.

Initiative Objectives:

- ❖ Encourage healthy behaviors and address children's health issues to help ensure healthy adulthood.
- ❖ Link eligible needy children to no-cost and low-cost healthcare coverage.
- ❖ Provide quality care and supportive services for at-risk youth and children in the dependency system to create a nurturing environment that enables and encourages them to succeed.
- ❖ Address and prevent the harmful effects on youth of exposure to violence.
- ❖ Support families with children as they transition from welfare to work and seek self-sufficiency.
- ❖ Create enriching experiences to engage youth and their families in activities that will help them reach their full potential as adults.

Initiative Two: The Environment

How we use our natural resources dramatically affects our environment, our quality of life, and our economic prosperity. Environmental preservation is imperative – we must ensure a livable environment, helping to sustain and enhance the land, water, air, and biodiversity upon which all life depends. At the same time, we must recognize that our population is growing rapidly. Sustaining our quality of life and economic vitality demands that we balance our responsibility to preserve environmental resources with our obligation to meet San Diego County's growth needs.

Initiative Objectives:

- ❖ Implement habitat conservation programs.
- ❖ Develop and implement land use planning strategies that address the issues, needs, and concerns of both the present and the future.
- ❖ Balance housing, open space preservation, and economic development needs on behalf of residents, taxpayers, and businesses.
- ❖ Implement a strategy to improve the water quality of our streams, rivers, bays, and ocean.
- ❖ Reduce environmental risk through regulation, intergovernmental collaboration, and leveraging public and private resources.
- ❖ Decrease conflict over land use and actively facilitate responsible development.

Initiative Three: Safe and Livable Communities

Basic safety and security issues are important. Making sure our neighborhoods are safe places to live, work, and play is essential, but promoting livable communities requires much more than just safety. Livable communities are those that provide the environment and amenities necessary for people to prosper, enjoy, and maintain a shared sense of civic pride. We must engage our resources and fellow citizens in efforts to develop and maintain a quality of life that is worth protecting. In short, there must be a balance between preparation for risk and uncertainty, and investment to improve our day-to-day lives. County services will continue to support this balance.

Initiative Objectives:

- ❖ Increase community residents' accountability for public safety.
- ❖ Address primary contributors to crime, including substance abuse, truancy, illiteracy, and mental health problems.
- ❖ Enhance efforts to stop domestic violence, focusing on prevention, victim support, and reducing recidivism.
- ❖ Improve emergency preparedness, response, recovery and mitigation capabilities for both natural and man-made disasters.
- ❖ Promote the health and well being of adults and seniors.
- ❖ Help residents' find safe and affordable housing.
- ❖ Promote wellness and self-sufficiency.
- ❖ Develop techniques to attract businesses to all economic sub-regions of the County.
- ❖ Maintain and expand parks.

- ❖ Expand access to information resources for all residents.
- ❖ Develop and support services, programs, and initiatives that enrich our residents' quality of life.

TAKING A LOOK AT AGING & INDEPENDENCE SERVICES

Our Customers:

Aging & Independence Services primarily serves seniors, disabled adults, abused, elderly and dependent adults, individuals with HIV, and others requiring home-based care to prevent institutionalization. Our Call Center, in addition to taking Adult Protective Service and In-Home Supportive Services referrals and case management referrals, also provides the community with information & assistance. Therefore, our potential customers can include the entire community of San Diego County.

Geographic Environment:

The San Diego region encompasses 4,261 square miles, and has three distinct regions within its boundaries. Those regions are 182 miles of shoreline and coastal plain, the interior uplands and mountains, and the deserts of the Salton Basin. Most of the urbanization is located in the western third of the county. Only 689 square miles are in incorporated areas of the county, while 6,572 square miles remain in unincorporated areas. The distribution of the older population among the cities in the county is uneven, ranging from 22.3% in Solana Beach to 10.1% in Imperial Beach. Jurisdictions with relatively high concentrations of older residents include La Mesa (20.4%), Del Mar (19.6%), Coronado (19.2%), and Carlsbad (17.6%). The "oldest" unincorporated communities in the county, measured by the percentage of older persons, are Anza-Borrego (35%), Palomar (24.8%), and North County Metro (24.3%). Countywide the proportion of older persons 65+ living alone is 25.1%.

Demographic Forecast – 2010:

The growth of the older population is a national, in fact, an international phenomenon. By the year 2010, the total population of people aged 60+ living in San Diego County is predicted to be 539,509. (This represents a growth of approximately 138,484 people.) The oldest age cohorts 75+, growing at the fastest rate, have the highest likelihood of functional disabilities and chronic conditions, and will represent the biggest challenges to the county in terms of service demands. The ethnic makeup for 2010 is forecasted to include: 373,111 Caucasians, 81,282 Hispanics, 65,548 Asian/Other and 19,568 African-Americans. It is predicted that the county's elderly, minority population will increase more quickly than the white population.

Demographic Environment:

San Diego County is the fourth most populated county in the United States, and has a total population of 2,813,833. Year 2000 Census data indicates that there are 404,025 people aged 60+ in San Diego County, which accounts for 14% of the total population. The ethnic makeup includes; 47,847 Hispanics, 305,010 Non-Hispanic Whites, 12,651 Non-Hispanic Blacks, 1,465 Non-Hispanic American Indians, 30,345 Non-Hispanic Asians, 1,089 Non-Hispanic Hawaiians and Pacific Islanders, 379 Non-Hispanics of an other race, 5,239 Non-Hispanics of two or more races. Among older residents, females outnumber males. They comprise 53% of the population aged 60-64; 54% of those aged 65-74; and 60% of the 75 and older group. The percentage of minority representation 60+ tends to decrease with age, suggesting significantly lower life expectancies for minority residents. The data shows that although the proportion of minority seniors is 24.5% for those persons 60+, the percentage decreases to 22.3% for those persons 65+, and further decreases to 16.9% for those 75+. The senior population continues to grow at a faster pace than the total population in the county. Between 1990 and 2000, the county population 60+ increased by 12%.

Demographic Trends:

SANDAG's Preliminary 2030 Forecast (November 2002) expects continued growth in the region's population, which is projected to total 3,889,604 by the year 2030.

The median age for San Diego County is increasing and is expected to continue to rise as the baby boomers age:

- in 1980, the median age for the San Diego region was 28.8 years;
- in 1990, the median age was 30.9 years;
- the median age in 2000 was 33.2;
- and, by 2030, is projected to be 39.2 years.

Between 1980 and 1990, the San Diego region's growth rate of 3.0% per year was greater than both the national rate of 1.0% per year, and California's rate of 2.3% per year. The average rate of growth from 1990 to 2000 declined to 1.3% and is expected to stay at that average annual rather through 2030. The decline is due to slowing of economic growth and lower fertility rates, as the population ages.

Minority populations comprised 35% of the region's total population in 1990. The 2030 preliminary forecast indicates that by 2030, the ethnic composition of the region will be:

- 41% White;
- 5% Black;
- 39% Hispanic;
- 15% Asian and other, by the year 2020.

The senior population continues to grow at a faster pace than the total population in the county. Between 2000 and 2020:

- the 60+ population will increase by 88.6%;
- the 65+ population will increase by 75.3 %;
- the 75+ population will increase by 50.2%; and
- the general population will increase by 27.8%.

The distribution of the older population among the cities in the county is uneven. For example, 22 percent of Solana Beach's population is 60 or older, while only 10 percent of Imperial Beach's population is over the age of 60. Other jurisdictions with relatively high concentrations of older residents include:

- La Mesa (20.4%)
- Del Mar (19.6%)
- Coronado (19.2%)
- Carlsbad (17.6%)
- Oceanside (16.6%)
- Lemon Grove (15.0%)

Lower concentrations of older residents are found in:

- Vista (12.5%)
- Poway (12.1%)

➤ Santee (11.9%).

Information for the purpose of planning was gathered from several groups, including:

AIS Advisory Council – comprised of persons who represent the older adult and disabled community, one third of whom are appointed by the Board of Supervisors.

Health Promotions and Disease Prevention Committee – represents persons involved in the planning or provision of health care and includes professions such as nursing, pharmacy, social work and other disciplines, which have an impact on the well being, fitness and longevity of seniors;

Adult Day Health Care (ADHC) Planning Committee – appointed by the AIS Advisory Council, this group meets monthly and is regularly attended by ADHC providers, new ADHC applicants and consumers' families;

Retired and Senior Volunteer Program (RSVP) Advisory Council – membership includes those capable of helping the sponsor (Aging & Independence Services) meet the RSVP administrative and program responsibilities including project assessment, fund-raising, publicity, and programming for impact.

Long Term Care Integration Project Planning Committee – comprised of more than 400 consumers, providers and other key long term care stakeholders across the array of services and throughout the health and social service continuum.

In addition to the many standing advisory and planning entities affecting the planning process, AIS has utilized other strategies for obtaining public input, seeking the widest possible array of opinions and gathering information about the needs of older adults and disabled individuals. Some of the more significant are:

Needs Assessment – San Diego County Aging & Independence Services Survey of Older Americans 2000 utilized most of the questions from the Core Questionnaire from the California Department of Aging. Mental health related questions were taken from the Health Assessment Form from the Social Health Maintenance Organization. The Survey was designed in a joint effort of AIS staff, AIS Advisory Council, and the San Diego Association of Governments (SANDAG). SANDAG also conducted the survey and submitted a report to AIS.

Public Hearings – Six public hearings were held January 2001, one hearing in each of the Health and Human Services Agency's six geographic service delivery regions. The hearings were conducted by the chair of the AIS Advisory Council, and staffed by the AIS Director, the Chief of Planning and Community Services and other AIS employees.

Aging Summits – Three Aging Summits have been held – the first in 1998, and the second in February 2000, and the third was in April 2002.

AIS has been proactive in developing new initiatives, and in particular has been a leader in bringing various groups together to address problem areas. Among the groups that are most significant and which continue to meet on specific issue areas:

In-Home Supportive Services (IHSS) Advisory Committee –Established in 2000 in response to the many critical issues facing both the consumers and providers of IHSS care. Comprised largely of consumers and providers, the Committee has been a major force in the County's decision to move In-Home

Supportive Services to the Public Authority model, in recognition that an "employer of record" needs to be established. The Committee has provided AIS with valuable information and direction about home care issues.

Public Authority – In response to a 1999 State mandate requiring the establishment of an employer of record for the In-Home Supportive Services program, the Board of Supervisors, in June 2001, approved appropriations and established an operating fund for the Public Authority in the Health and Human Services Agency. Additionally, the Board adopted the County Ordinance creating the San Diego County In-Home Supportive Services Public Authority.

Project Care - Established in partnership with AIS, the Project Care sites provide the means for determining the health and safety status of older persons living alone. Project Care coordinators meet with AIS staff each month to discuss the issues affecting seniors who live alone and are isolated. In addition to being an important gateway for older adults to access protective and safety services, Project Care leaders provide an important on-going source of information about the needs of the county's most vulnerable older adults.

Veterans Services Advisory Council Board –Serves as an information resource to the Board of Supervisors on issues related to military veterans, promotes coordinated efforts of public and private sector organizations engaged in services to military veterans, develops and makes policy recommendations and provides a regional public forum for the discussion of issues related to military veterans.

Outreach and public information efforts are made through several sources, including:

Outreach and Education – The AIS section that informs the community about AIS services, with an emphasis on Adult Protective Services. Outreach and Education staff are assigned regionally, which provides an effective means of two-way communication with provider agencies and the community at-large.

AIS Bulletin – is a monthly publication sent to cities and other public officials, senior centers, service agencies, professionals in the field of aging and older adult and disabled individuals. The Bulletin reports on activities and events of interest to the senior and disabled community and the aging network.

AIS Participation in Community Meetings – in addition to public hearings, AIS staff is integrally involved in community meetings and other activities. Examples include membership on the Council of Minority Aging and the Elder and Senior Subcommittee of the Regional Center for Developmental Disabilities.

“Kids”

Improve opportunities for children

Strategic Goal: Make Sure They Are Cared for and Protected

Operational Objective	Activities	Measure & Target	Target Date	Lead
Increase by one the number of high school campuses utilizing an intergenerational senior mentoring program	➤ AIS Intergenerational program will work with educational and community leaders to identify schools and provide support to establish mentoring program	➤ Successful establishment of an Intergenerational Senior Mentoring Program	June 2005	Nick Trunzo
Establish an Intergenerational Senior Mentoring program to assist youth involved in the juvenile court system or family reunification	➤ AIS Intergenerational program will work in conjunction with the juvenile court system and the Commission on Children, Youth and Families to establish the program	➤ Assist 25 youth and families involved in the Juvenile System	June 2005	Nick Trunzo

Strategic Goal: Make Sure They Reach Their Full Potential

Operational Objective	Activities	Measure & Target	Target Date	Lead
Increase the number of foster youth participating in Intergenerational Senior programs	➤ Provide consultation and assistance through the AIS Intergenerational Program to San Pasqual Academy and other appropriate organizations	➤ Increase the number of Senior Mentors to 150	June 2005	Nick Trunzo

“Safe and Livable Communities”

Promote natural resource management strategies that ensure environmental preservation, quality of life, and economic development

SOURCE: SANDAG Preliminary 2030 Forecast.

This forecast was accepted by the SANDAG Board of Directors in October 2002 for distribution, review, and use in planning and other studies. A final forecast will be prepared in fall 2003. This forecast may exceed the development potential of current general and community plans because it incorporates higher intensity and more mixed use development opportunities within smart growth areas identified by local agency staff. Smart growth areas were identified in part to support the expanded transit system envisioned for the region in the 2030 Region Transportation Plan.

Information for 2000 may not match other census data published by SANDAG because detailed census information on housing structure type and income was not available in time to be included in the forecast. Also, geographic area definitions used in this forecast are preliminary and have been refined for use in our census and current estimates products. The fall 2003 final forecast will reflect all releases of census data and updated geographic area definitions.
